"Only when it passes

this final test is a fabric

considered worthy of the RICHMAN

"To hegin with, we buy the choice weaves of mills whose fabrics are usually found only in clothes sold at very much higher prices. Then we test cach piece to make sure that it is pure wool, and of specified weight-and our friction test makes sure of the wearing quality of the nap. But unless a fabric is stout hearted enough to stand this breaking test of forty pounds to the square inch, we will not accept it "

WE not only apply rigid quality tests to all the materials used in making Richman's Clothes, but we thoroughly shrink every yard of fabric—and we maintain the highest quality standards in each of the 232 separate operations employed in making a suit.

We are proud of the reputation we have been building for half a century—and we will not attach a label bearing our good name to any garment unless it is a credit to us and to the man who wears it.

Richman's Clothes give you most for your money at any time in the year. No sales—but always uniformly high quality—always no styles-always the same price-\$22.50 for any suit, overcoat, or tuxedo suit including a silk vest.

being outlined which will meet the approval of all the elements which heretofore have openly opposed constabulary or other similar police systems. Banking, labor, farm and wemen's organizations, through their representatives, are reported to be in conference with sub-committees of the two legislative houses looking to the drafting of a substitute for the safety department bill proposed by the joint legislative committee on economy. The word yesterday was that the proposed measure would be in such form as to be ready for committee discussion today and that barring serious disagreement which yesterdny was said not to be expected, the bill will be reported out at once with recommendations for passage by both houses.

State police bills in the past have fulled of enactment into laws owing to the unfriendliness of labor toward them, labor fearing the use of any force created under them in labor disputes and in other wave looked upon by labor as high-handed, but at present labor is favoring such a bill for the rural protection it will afford. However, it is said to be exacting as the price of support the concession that any force created under the proposed measure will not be permitted, numunicipality save for specified duties and pur-

Objection has also been raised that, in this age of police corruption and victors practices, a state police force may prove more of a liability than an asset to law enforcement, and fear has been expressed that a state constabulary may cause the revival of the vicious practices which reached the zenith of effectiveness under the discarded justices' tions and fears, those b mud the bill being formulated are hopeful that it will meet

It is to be questioned also it there is not grave danger to it up a so that to one man the decision of what are and who are not munitions of war, for a tale day and age that term is a decidedly comprehensive one. We have called attention, it may of recalled by our scaders, to what might be the feelings of the Kansas senator, should some follow-senator suggest that obluments of grain might be forbidden under the pro-THURSDAY - - - - FIRRUARY 14, 1929 posted authority. We can see how making fish of the product of our industry and fowl of the product of some other industry might have an eyll effect both at home and abroad.

It has been made evident, that, upon first consideration, many newspapers were taken with the proposal, if we are to judge by their editorial expression. It is pleasing to note that other newspapers, giving the matter more consideration, are not in harmony with the plan and that comment indicates a growing faciling in congress that the Capper resolution, as well as the somewhat similar The day reminds us that, if nothing else, Porter resolution, gues too far

This feeling of alcofness to the plan is the more easily attained since it has developed that all European members of the League of Nations are enthusiastic over it, nossibly, as has been hinted, because of the fact that the iden is of League of Nations origin, transinitied by internationalist influence.

"By the time the powerful League of Nations has ratifled the peace treaty," Is the comment of one newspaper, "there will be two interlocking directorates, one back of the treaty and one in the League. The Capper resulution would take th celebrated Article X and Article XVI out of the covenant and attach them to the Kellogg treaty." "In the event of hostilities between nations

It appears to be the futent of the resolution to hold the president responsible for a deelsion on to which nation is the aggressor,' is a comment from the upper house of con gress. "I can not imagine a surer way of creating an international misunderstanding The adoption of such a resolution is on invitation to put the United States in the middle of every international brail in any part of the world" In other words, having refused to enter the

League of Nations through the front door. by means of the Capper plan we would enter through the renr.

In the light of such companiative con Aleting views, it is evident that the proposat is one which should be given deep study and consideration; that it has too many elements of possible danger to be put over hurriedly and without much thought and consideration,

Clearness of voice is important to you and to the people with whom you conterse. But some-times there is hourseness, if not actually loss of Hoarseness or huskiners is frequently the result

of chronic cutarrib. It comes, too, from the irri-tuting effects of dust or a smoky atmosphere upon the tisanes of the throat.

irritation of the threat?

Iritation of the throat?

At this time I shall not discuss smoking, as to its harmfulness or otherwise. I desire to consider morely the manner of smoking.

Livery smoker has his particular style. He may smoke a pipe, a cigar or a cigaret. He may use a holder. He may be a "dry smoker" and luttilly moisten the end of the cigar or cigaret. He may be a "wet smoker" and luttilly moisten the end of the cigar or cigaret. He may be a "wet smoker" and have the cigar butt or even half its length, soaked with soliva. All folks with sensitive throats should avoid chewing the cigar. ing the cigar.

The international committee of fluancial experts that is to revise the Dawes plua of German reparations payments will meet in Parla formally for the first time today. A limit of five weeks has been set on its deliberation. That is a short time in which to clean up the recommit mees in Europe precipitated by the war, complicated by the treaty of Versailles and only temporarily relieved by the Dawes committee me years ago, but if it achieves a final estimated in the contractions operations at in trainers of the throat.

If we now ever thought that the habit of chewlarge you ever thought that the habit of chewlarge or anchors are the repaired on a constant a final settlement of the reparations questions it a lintf.

Specifically, what this committee is expected to do is to review the results of the Dawes plan, which admittedly was largely experimental; and in the light of its inclings, set a definite figure for Gerlight of its inclings, set a definite right for German reparations and suggest means by which Germany can liquidate her obligations, without destroying her economic structure. The Dawes constitute fived the amount of the annual payments to be required of Germany; but it did not fix the number of these payments and consequently left the total amount of Germany's both undetermined. So far, Germany has met the annuluse. She has not been able to do this out of an excess of tx ports over imports, as it was expected she would, ports over imports, as it was expected she would, since the behavior of trude has been against he whether she has been forced to meet them largely out of the praceeds of foreign luans, as German officials sor, would seem to be less easily dis-covered. Anyway, Germany claims that she can't covered go on indefinitely paying 2,500,000,000 gold marks year to her creditors, without disaster to her self and the rest of Durope. She wants the total ent down, a definite number of venes allotted bei in which to pay and her capacity to pay taken in

Against this France resolutely sets her face, Germany's ability to pay is no concern of here, Germany must put her, whether Germany one of not, as much as France has to pay Great British and the Luited States on account of war debts, as well as some \$1,000,000,000 for reconstruction of doustated areas. This typically Poincaresque stand as supported to the hilt by Reigium; while Italy sympathizes with it to some extent, and

American interest in German reparations is shight, but other considerations connect us with the effects to solve a situation that is hudering the effective trapproclament of Germany and her former foes and thus keeping Lurspe divided into two heattle camps. Secretary Hughes suggested the Dawes committee. Americans served on it, where many former for the contraction of the committee of hestile camps Secretary Hughes suggested Dawes committee Americans served on Therefore it would have been quite bring Americans to serie on the new committee more tangible interests were not involved. matter of fact, we are indirectly connected with suggested to enable Germany to meet her obligaotherwise could is b mobilize her etedit in the form of an infernational mobilize her etent in the form of an incentional the line that might run as high as \$5,000,000,000.

The American market would be expected to absorb at least hilf of that. We are, then, netually, if not officially, very much interested in what the committee does. PREQUENT, thorough inspections and surveys of insured properties are an indispensable part of the fire insurance business as transacted by the Stock Companies Hundreds of men are engaged in this work

Inspections provide the data from which: 105ttrance maps are made—rate makers compute the rate-the agent writes the policythe underwriter judges the risk, and accepts

The inspector must understand construction, must have a knowledge of the individual hazards of every business, the details of public and private fire protection, the susceptibility to damage of contents and many other matters relating to the character of an insurance risk.

Through his work defects and hazardous conditions are brought to the attention of the property owner Inspections are the immediate cause of eliminating fire hazards with their attendant reduction in fire waste and the cost of insurance.

Inspections have substantially contributed to the steady decline in the average rate in this country with the result that fire insurance is today one of the cheapest necessities

I light up a <u>Lucky</u>

whenever I am tempted to eat between meals" Herbert Bayard Swope

> Herbert Bayard Swope, Internationally known journalist, former Frecutive Editor N 1 Morning Wo

"The activities of a newspaper demand good physical condition. I find Lucky Strike an immeasurable aid in helping me keep trim and fit. Whenever I am tempted to eat between meals, I light up a Lucky. Toasting makes Lucky Strike the cigarette of joy and benefit."

HERBERT BAYARD SWOPE

THE modern common sense way—reach for a Lucky instead of a fattening sweet. Everyone is doing it - men keep healthy and fit, women retain a frim figure. Lucky Strike, the finest tobaccos, skilfully blended, then toasted to develop a flavor which is a delightful alternative for that craving for fattening sweets.

Toasting frees Lucky Strike from impurities. 20,679 physicians recognize this when they say Luckies are less irritating than other cigarettes. That's why folks say: "It's good to smoke Luckies."

Note: Authorities attribute the enormous increase in Cigarette smoking to the improvement in the process of Cigarette manufacture by the application of heat. It is true that during the year 1928, Lucky Strike Cigarettes showed a greater increase than all other Cigarettes combined. This confirms in no uncertain terms the public's confidence in the superiority of Lucky Strike.

No Throat Irritation-No Cough.

lar artists of the Phileo program, WATCH YOUR TUBES IN RECEIVERS

MOST troubles around a radio set MOST troubles around a radio act can usually be located by a careful diagnosis at the lands of an expert. However, the first thing to check are the tubes. If they are new are have been used but a short time and light up, the chances are the tubes are all right. If they have been used for some time and the set operates but only weakly or gives agreat deal of distortion, the tubes should be tested on a standard tube checker. This can be done at any radio service station in a short line. It is head to perform this test before anything cisal is done to the receiver. In case the tubes survive the test, the next the tubes survive the test, the next step is to call in the radio expert and have the wiring gone over. Or you can do it yourself if you have a untural hankering for probing the ills of your receiver.
